This book presents current research in the study of wind tunnels, including the design, execution and numerical rebuilding of a plasma wind tunnel with the aim to analyse shock wave boundary layer interaction phenomena; the Mainz vertical wind tunnel facility experimenting on cloud physics and chemistry; an air-conditioned wind tunnel environment for the study of mass and heat flux; using wind tunnel studies to evaluate the drag coefficient of the tree crown and Pre-X aerodynamic/aerothermal characterisation through computational fluid dynamics and wind tunnels.

Here are some of the most extravagant and ingenious images ever created in art and in haute couture- fruits of the love affair between fashion and Surrealism. Their relationship began in the Paris of the 1920s when Surrealist artists experimented not only with the fine arts but with photography, film and costume design.

Presents the movement as not merely an aesthetic vocabulary, but also as a subversive attitude - a new way of looking at the world.

Offers the first overarching history of the humanities from Antiquity to the present.

A significant addition to the literature on gas turbine technology, the second edition of Gas Turbine Performance is a lengthy text covering product advances and technological developments. Including extensive figures, charts, tables and formulae, this book will interest everyone concerned with gas turbine technology, whether they are designers, marketing staff or users.
