Re: Honda GX390 wont stay running Yeah, just went thru that with a GX340 engine on my pressure washer - the thing acted like a fuel problem. It would start and run OK at idle, but under load it would run maybe 15-20 seconds and die - if I was quick enough, choking it would SOMETIMES keep it from dying.

This time, Margot from Castillon wins a travel grant for excelling in the Roman history exam. The randomly picked destination is Via Belgica, a 450-km Roman road (50 BC) stretching from France to Germany - through Belgium and The Netherlands. Written to inform rather to impress, the heavily illustrated "Via Belgica" with its surrealistic personages on the real background adds another adventure to "Margot on a Roman Road" series, along with "Via Aurelia," "Via Claudia-Augusta," "Via Domitia," "Via Fossa," "Via Maris" and "Via Militaris." Where you still are unable to find the destination of your heart, the other 80+ travel diaries from this author may offer a pleasant remedy.

As the European Union (EU) launches its common currency (the Euro), Central European (CE) nations are searching for best practices in public liability management in order to smooth their integration into the EU. This work addresses that concern, examining borrowing policies, institution building, portfolio optimization, and the implications of the Euro and EU accession for public debt management. To help the CE countries achieve their goals, the World Bank and the European Commission held a two-day seminar in Brussels in mid-December 1997. European Union Accession presents the papers delivered at that seminar which was attended by all ten EU applicant countries: Bulgaria, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, the Slovak Republic, and Slovenia. The workshop pursued the following goals: 1. to investigate the implications of the launch of the Euro and of the EU accession on fiscal prudence and on the borrowing strategies of CE countries; 2. to facilitate the dissemination of the best public liabilities management techniques developed worldwide; and 3. to explore plausible arrangements to promote prudent public liabilities management in Central Europe through a regional expertise network.

From theory to final assembly, the full spectrum of racing engine building is covered in detail. Theory includes how to determine the effects of compression ratio, connecting-rod length, piston velocity, and cylinder-head airflow on power, fuel efficiency, and durability. How to choose, recondition, inspect, stress relieve, machine, fit, and assemble all systems and components are covered in detail supplemented with hundreds of photos, charts, and drawings. Included are high-performance coatings to reduce wear, stress relieving to increase durability, special materials to increase strength, and modifications to the lubrication system to maximize power and durability. Inspection, machining, and assembly processes are shown using the latest tips and techniques: valve guide and seat installation and machining; crankshaft balancing, cylinder-block sleeving, boring, and honing; oiling-system modifications, camshaft degreasing, and more. The preassembly chapter shows how to check that all components are fitted and adjusted correctly to ensure they perform after final assembly.
