### ~~Science – Bird Beak Adaptations Flashcards | Quizlet~~

Adaptations are inherited characteristics that increase an organism ' s chance of survival. Those with the most helpful adaptations will be the most likely to live long enough to pass on their genes to the next generation.

### ~~Activity: Bird Beak Adaptation Lab~~

An adaptation is a feature or behavior that improves an organism ' s survival. ! Bird wings and feathers are adapted for different types of flight. ! Bird beaks and feet are adapted for different feeding behaviors and prey.

### ~~BIRD ADAPTATIONS – WINGS, BEAKS, AND FEET~~

An adaptation is a characteristic that helps a plant or animal survive in its environment. Bird beaks have adapted for many things such as eating, defense, feeding young, gathering nesting materials, building nests, preening, scratching, courting and attacking. The size and shape a beak is specific for the type of food the bird gathers.
