Review and Assessment, Ninth Edition, provides the best preparation for meeting the challenges of the exam. --

Providing a balanced, detailed account of the basic science of the digestive system, as well as complete coverage of current diagnosis and management. This medical text also offers up-to-date discussions of the cell biology and molecular biology that determine the digestive system's function, in addition to thorough descriptions of organ physiology and the pathophysiology of the signs, symptoms and laboratory abnormalities of organ disease. This revision has been brought completely up to date with a new main editor, new authors, and new editors specialising in imaging and pathology. The CD-ROM has all the same information as the text and offers links to medline abstracts and papers and a pathology atlas.

Whereas other textbooks mix a clinical approach with large amounts of the basic science of gastroenterology, this book concentrates on providing practicing gastroenterologists with 100% clinically focused, evidence-based chapters on how to correctly diagnosis and treat all disorders of the digestive tract. Once again, the book is divided into 4 clear parts: Symptoms, Syndromes and Scenarios; Diseases of the Gut and Liver; Primer of Diagnostic Methods; and Primer of Treatments. An accompanying website contains more than 85 high-definition surgical videos of diagnostic and therapeutic endoscopic procedures, 300 MCQs written to mirror the American College of Gastroenterology postgraduate course exams, more than 35 management protocol charts for different diseases, and 850+ illustrations for use in scientific presentations.
